

Portal Features Guide

Exhibitor | Printing | Admin

This guide summarises the three main portals in the Akshar Events platform: what each portal is for, who can access it, and the key features available.

Exhibitor Portal

Company registration & event logistics

Access

Sign in at </authentication/exhibitor>.

Overview

The Exhibitor Portal is a single dashboard where exhibiting companies manage their event registration, team, travel documents, branding artwork, and logistics for a published expo or conference.

Key features

- Overview dashboard

View registration progress, team size, transport slots, meal passes, tours booked, booth assignment, event deadlines, and quick links to key tasks.

- 6-step registration form

Complete company info, booth preferences, travel & logistics, tours & transport, food selections, and final review. Auto-saves as draft; submit when ready.

- Additional requirements

Select add-on items from the event catalog (equipment, services, branding items) with live cost estimates and PDF invoice download.

- Brandings

Upload print-ready artwork per branding item (banners, stickers, badges & stripes, etc.). Submit for review; re-upload if rejected.

- Team members

Add and manage team roster with roles, transport, hotel, diet, and tour preferences. Upload passport, visa, ID, and health documents.

- Air booking requests

Request flight coordination for team members (requires passport number and passport document). Track status from pending through verified, rate sent, and paid.

- Bulk member upload

Owners and Admins can import up to 200 team members via CSV and provision portal accounts with welcome emails.

- Tours & travel

View shuttle, tour, and travel activity selections made during registration.

- Schedules & itineraries

See published event schedules and organiser tour itineraries with photos, stops, and timelines.

- Food outings

Review meal selections, dining experiences, and dietary requirements submitted during registration.

- Notifications

Receive in-app alerts when organisers publish schedule or itinerary updates.

Typical workflows

Registration

1. Sign up
2. Link to an open event
3. Complete 6-step registration
4. Submit

Air booking

1. Add team members
2. Upload travel documents
3. Request air booking

Branding artwork

1. Select branding items
2. Upload artwork
3. Submit for printing-team review

Printing Portal

Booth branding artwork production

Access

Sign in at </authentication/printing>. For Printing Staff and Admins only.

Overview

The Printing Portal manages exhibitor booth branding artwork from submission through production and installation. It is not attendee badge printing - it tracks print-ready files for banners, stickers, signage, and similar booth materials.

Key features

- Artwork review dashboard

Browse all exhibitor companies and their branding submissions. Search companies, view metrics (items awaiting review, affixed, etc.), and open per-item details.

- Verify or reject submissions

Approve submitted artwork for production or reject with a reason so exhibitors can re-upload corrected files.

- Production pipeline tracking

Advance each item through: Verified, Sent for printing, Printing in process, Artwork delivered, Artwork affixed.

- View & download files

Open and download original artwork files (PDF, JPG, PNG, WEBP, SVG, AI/EPS) stored securely in Cloudinary.

- Status history

Full audit trail of every status change with timestamps and who made each update.

- Floor plan view

Interactive booth map colour-coded by aggregate artwork status. Filter by branding item type, search booths, and jump to company details.

Typical workflows

Artwork review

1. Exhibitor uploads artwork

2. Exhibitor submits
3. Printing staff reviews

Approved items

1. Advance through production stages
2. Deliver to booth
3. Mark as affixed

Rejected items

1. Return to exhibitor for correction
2. Exhibitor re-uploads
3. Exhibitor re-submits

Admin Portal (Event Master)

Expo operations & event configuration

Access

Sign in at /authentication/login. For platform Admins only.

Overview

Event Master is the central operations console for running an expo. Admins create and publish events, configure logistics, monitor exhibitor data, manage floor plans, coordinate flights, and plan supplies - all from one dashboard scoped to the primary published event.

Key features

- Event management

Create events (expo, conference, job fair, etc.), save as draft or publish immediately. Published events appear in exhibitor signup.

- Exhibitor registrations

Browse and search all exhibitor registrations. View company profiles, registration progress, transport, food, members, and tour selections.

- Team members (aggregate)

Cross-exhibitor roster view with roles, transport, hotel assignments, and food preferences.

- Flight bookings

Manage air-booking workflow: verify travellers and documents, send packages to travel agent, send rate quotes, and mark members as paid.

- Floor plan & booth allocation

Interactive booth map. Assign exhibitors to booths, upload custom floor plan images, and sync booth numbers to exhibitor records.

- Supply planning

Estimate water bottles, meal passes, badges, event kits, and other supplies from team counts with configurable buffers.

- Item master

Create and manage the event supply catalog (booth packages, equipment, branding items, services) that exhibitors select from.

- Hotels & restaurants

Configure accommodation and dining options. View exhibitor accommodation requests and meal selections.

- Event schedule

Manage day-by-day schedule with speakers and photos. Changes sync to the public agenda and notify exhibitors.

- Tour & travel itineraries

Build multi-day itineraries with stops and photos. Publish to exhibitors, import from Excel/CSV, and send update notifications.

- Tours & travel activities

Create tour and travel activities with slots and pricing. Toggle visibility for exhibitor registration.

- Transport overview

Read-only aggregate of exhibitor transport requests across all companies.

- Printing access

Admins can also access the Printing Portal to review branding artwork alongside printing staff.

Typical workflows

Event setup

1. Create and publish event
2. Configure hotels, restaurants, schedule, floor plan, and catalog

Exhibitor monitoring

1. Exhibitors register
2. Admin monitors data across dashboard tabs

Flight requests

1. Verify travellers
2. Send to travel agent
3. Send rate quote
4. Mark as paid

Itineraries

1. Build itineraries
2. Publish to exhibitors
3. Notify exhibitors

Role summary

Exhibitor Owner / Admin / Staff

Exhibitor Portal - manage company registration, team, and logistics

Printing Staff

Printing Portal - review and track booth branding artwork

Platform Admin

Event Master + Printing Portal - full event operations and artwork review
